PROJECTS

Kreations* by Kat

- Project is an ecommerce application that allows the business owner and to sell their custom products
- Admin has the ability to track their products electronically in a hands on and user friendly way
- The Paypal API was utilized for payment authentication and processing
- Git was utilized for our versioning control and collaboration
- Please view the live demo: <https://kreationsbykat.herokuapp.com/>

Teems T-Shirts

- An E-commerce web application that sells custom T-shirts with proceeds going to Charity
- Our team began by designing wireframes on Adobe XD, then Ruby Rails to create the different pages
- Bootstrap was utilized for styling purposes
- Payment authentication and processing is being handled by the Stripe API
- Git was utilized for our versioning control and collaboration
- Please view the live demo: <https://awesometeena.herokuapp.com/>

Munchies

- This web application if for all the 'Foodies' looking to find new restaurants in their area
- This app utilized React and React Bootstrap to create the page structure using components and Hooks
- CSS and Material UI were used for styling and icons
- The App uses the Yelp API, allowing users to filter by location, cuisine type, and price point
- Please view the live demo: <http://latenightmunchies.herokuapp.com/>
